Skin problems come one after another

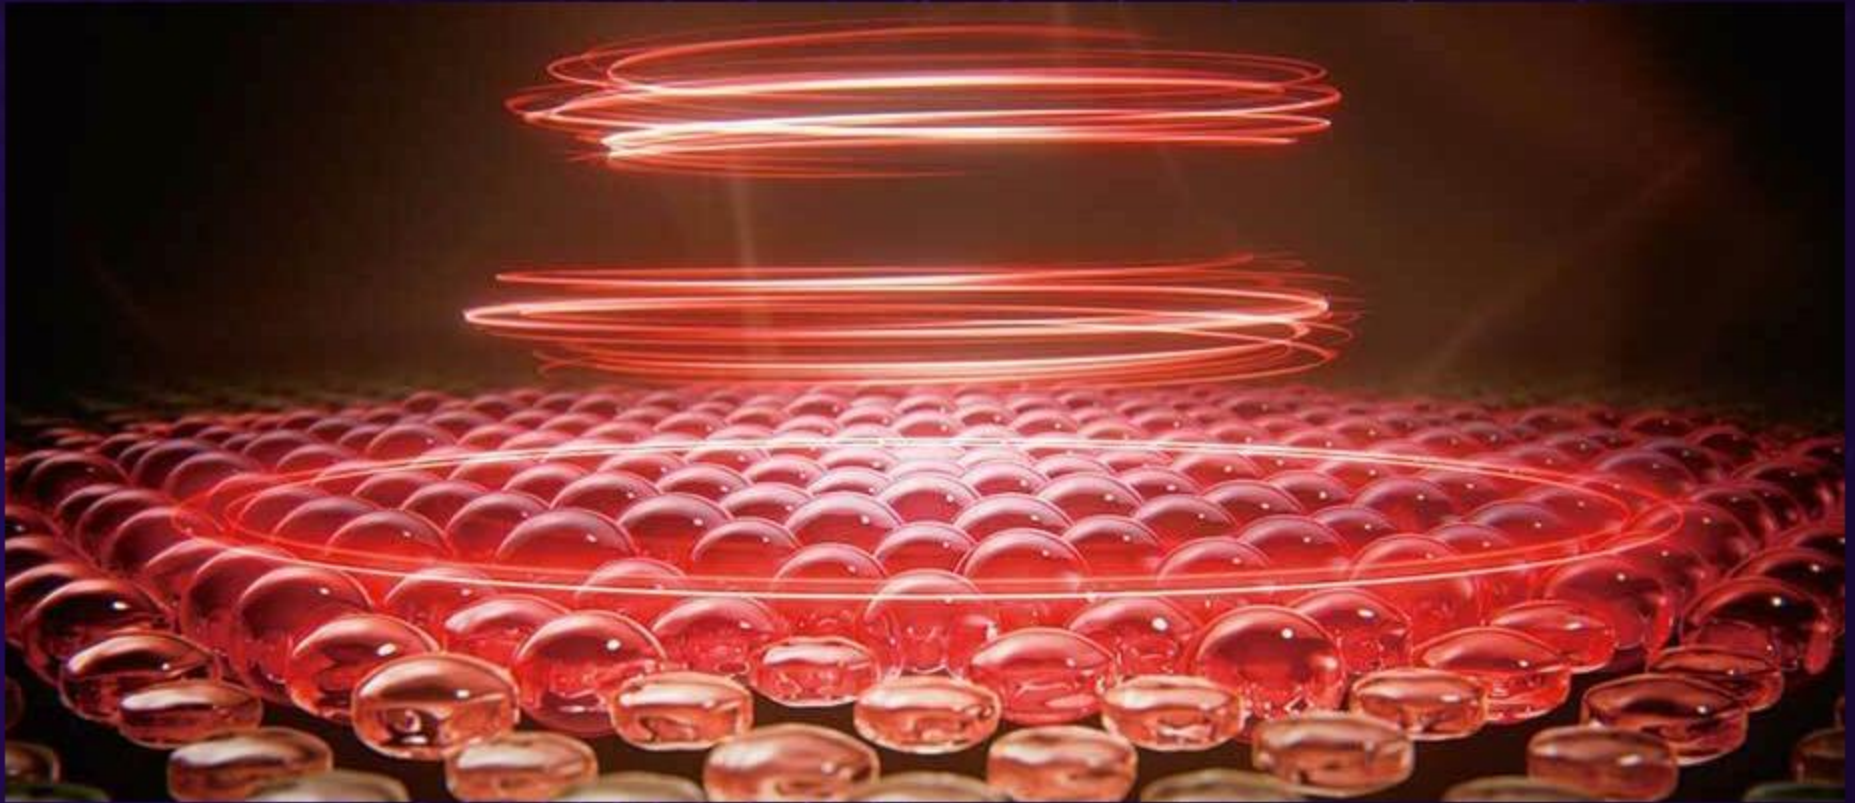

Product parameters

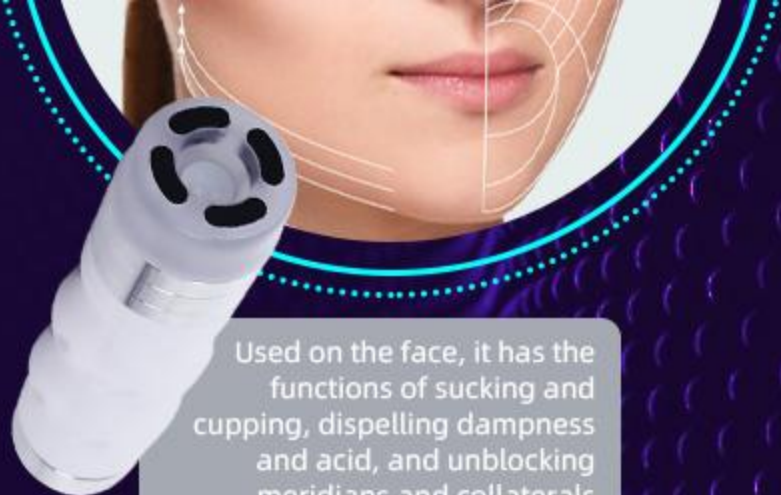

Product Name	Red and black carving instrument
Product model	DY.1320A
Packaging size	52*51*118cm
Product weight	25.5kg
Packing	Wooden crate
Operation head	7 of them
quantity	One unit
screen	touch screen
Voltage	110V/220V
Cooling system	forced air cooling

Function Introduction

Shape and beautify the body, control obesity

By using aggregated Johnson waves to emit high-frequency sound waves and hormone vibrations, fat cells generate numerous vacuum air pockets inside and outside the fat cells, which strongly impact the fat cell membrane and cause inward rupture, breaking down triglycerides into glycerol and free fatty acids. Then, by modulating the frequency waves up to 0.5 MHz and deep penetration, oxygen and organic matter are supplied to the skin to enhance cellular function, improve blood and lymphatic circulation, activate metabolism, eliminate and soften honeycomb like tissue, and achieve plasticity and control of obesity.

Used on the face, it has the functions of sucking and cupping, dispelling dampness and acid, and unblocking meridians and collaterals

Used for hands and legs, it has the functions of sucking and cupping, dispelling dampness and acid, and unblocking meridians and collaterals

Used for the buttocks of the body, it has the functions of sucking and cupping, dispelling dampness and acid, and unblocking meridians and collaterals

The high-frequency vibration explosion of fat cells combined with the introduction of shaping products, causes fat cell implosion, shaping and beautifying the body

Used for relieving fatigue and discomfort in the shoulders, neck abdomen, back, limbs, etc

Suitable for the back, it can be scraped off by micro electric therapy to clear meridians and expel dampness

Remove wrinkles
Weight loss and body shaping

Product Details

CHIP UPGRADE

Adopting high technology and microcomputer control, it is perfect, convenient and fast

MULTIPURPOSE

Weight loss and body shaping, cupping and scraping therapy, delicate lifting, detoxification and dampness removal

LED TOUCH SCREEN

The screen is clearer, the overall design is simpler, the operation is more convenient, and the touch is more sensitive.
