What is CO2 oxygen?

Co2 oxygen takes its inspiration from natural hot springs known for inducing skin oxygen. By simulating this effect, co2oxygen triggers a body response that sends oxygen to the treated area. At the same time co2oxygen exfoliates the skin and creates an optimal environment for infusion of essential nutrients both during and after treatment. The ability to layer Radio Frequency induces collagen and elastin regeneration in the dermis layer, which leads to smoother and tighter skin and a reduction in fine lines and wrinkles.

CO2 oxygen: The water & oxygen jet facial machine uses oxygen under extreme pressure and water, takes tiny water drops, through spray-type to act on skin. It can penetrate nutrient components to pores and cracks of skin from the epidermis to dermis layer, then promote rebirth of cells, rapidly and directly supply rich nutrient for skin. Simultaneously, it can clear deep dirt in epidermis. Oxygen of extreme pressure and nutrient liquid can stimulate the rebirth of fiber tissue in dermis, make cells metabolism.

It can treat :Blackhead Acne, Stain, Pouch Removal, Dried-up, Wrinkle, Forehead, Moisturizing, Rough, Dull, Loose, Skin whitening

RF: rf device pertinently delivers BIO thermal energy by transforming high frequency energy 50-65°C; recover cell functions, increase blood circulation, degrade fats, normalize hormone balance by inducing expansion of blood vessels and elevating temperature of tissue; promote revitalization of collagen by stimulating; it is a cutting edge device that heals the balance of the face and body.

Ultrasonic :100 million to 300 million times per second ultrasonic frequency, the transmission process of the body, being the skin, dermis, subcutaneous tissue of the absorption, the absorption of ultrasonic waves into heat, ultrasonic Thermal effects of biological tissue temperature increased slightly (0.5~1.0°C), to promote capillary Function of blood vessels and the flow of lymph cells, nutrients needed to help the cells transport to the capillaries, promote metabolism. Close to the skin surface without capillary blood parts of the tube, instead of lymph blood flow that can help to change the flow of lymph have rough skin look, promote metabolism. And to assist the low of lymph, maintain healthy skin. Maintain skin elasticity / break down fat and prevent obesity. 100 million times per second ultrasonic vibration transferred to the organization, the organization will produce along with ultrasonic vibrations per second, one million times Slight vibration. Slight vibration to stimulate biological tissue and skin tissue, relieve tension, maintaining skin elasticity, the heat generated by vibration easier, help prevention of obesity.
